

**raum&klang – we bring sound into every room**

## Mission

We create audiophile experiences that perfectly complement architecture and design – for gastronomy, hospitality, retail, private living spaces, event venues, and mobile solutions like yachts or motorhomes.

## Portfolio

### Individual sound concepts

Planning and implementation of custom sound systems, perfectly tailored to room design and acoustics.

### Integration without compromise

High-quality speaker solutions that blend harmoniously into interior design without visual distractions.

### Psychological impact

Optimal music and sound design to enhance consumption enjoyment, dwell time, and guest satisfaction.

### Professional sound systems

From restaurants, hotels, boutiques to event locations – raum&klang delivers perfect sound for every ambiance.

### Private sound worlds

Exclusive solutions for home theaters, living rooms, gardens, and outdoor areas – sound quality at the highest level.

### Mobile and maritime systems

Optimized audio installations for ships, yachts, busses, and mobile homes – technology that adapts.

### Financing models

Attractive options specifically for the hospitality industry for quick implementation without large initial investments.

## Why raum&klang?

### Holistic planning

Audio is considered integratively from the beginning.

### Perfect sound quality

Tailored tuning for every environment.

### Design-oriented implementation

Visible technology disappears, the experience remains.

### Psychologically effective acoustics

Sound influences purchasing decisions and well-being.

### From a single source

Extensive network of partners including electricians, carpenters, and drywallers.

### Long-term support

Maintenance, updates, and support from a single source.
